Subject: RE: radionuclides

Rupert,
Attached is the latest copy of the sampling plan tables that I have. The list of analyses for the rad is current. However, NAREL said they could not do the parameters listed below. I don't know if anyone updated the tables in the SAP to reflect this change.

"Also, we will not be able to provide results for Th-232, U-234, and U-238 by gamma spec, nor can we provide U-236 by alpha spec."

Gene, I know we shortened the list of analytes we are running for rad, but I can't find the current list.
Could you please forward to me soonest.
thanks
Rich
